this book presents the distinctive theoretical and methodological approaches in geography education in south america and more specifically in brazil chile and colombia it highlights cartography and maps as essential tools and provides a meaningful approach to learning in geographical education thereby giving children and young people the opportunity to better understand their situations contexts and social conditions the book describes how south american countries organize their scholar curriculum and the ways in which they deal with geography vocabulary and developing fundamental concepts methodologies epistemological comprehension on categories keywords and themes in geography it also describes its use in teachers practices and learning progressions the use of spatial representations as a potent mean to visualize and solve questions and harnesses spatial thinking and geographical reasoning development the book helps to improve teaching and learning practices in primary and secondary education and as such it provides an interesting read for researchers students and teachers of geography and social studies

this book provides a clear overview of current thinking on the teaching and learning of geography it is an ideal companion to all students beginning a career in teaching the subject in secondary schools the chapters are written by experienced teacher educators and bridge both theory and practice the writers focus on the continuities whilst setting them in the context of the changing curriculum the book is divided into four parts part one examines the historical context of geography teaching part two looks at issues of course planning design syllabuses and programmes of study underlying this section is the assumption that geography should not be considered in isolation from other subjects but rather as part of a whole curriculum part three concentrates on teaching and learning and includes chapters on the use of maps field work it and first hand experience within a community the final section covers the issues associated with assessment across the whole school age range

learning to teach geography in the secondary school has become the widely recommended textbook for student and new teachers of geography it helps you acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and challenging lessons it is grounded in the notion of social justice and the idea that all

students are entitled to a high quality geography education the very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education the new edition considers the current debates around what we mean by geographical knowledge and what is involved in studying at masters level key chapters explore the fundamentals of teaching and learning geography why we teach and what to teach understanding and planning the curriculum effective pedagogy assessment developing and using resources fieldwork and outdoor learning values in school geography professional development intended as a core textbook and written with university and school based initial teacher education in mind learning to teach geography in the secondary school is essential reading for all those who aspire to become effective reflective teachers praise for previous editions of learning to teach geography in the secondary school this is a practical and visionary book as well as being superbly optimistic it has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere practical activities and ideas are set within a carefully worked out authoritative conceptual framework the times educational supplement this is a modern powerful relevant and comprehensive work a standard reference for many beginning teachers on geography initial teacher training courses educational review

i am very pleased to have been asked by rod gerber to provide a preface to such a book not least because of the twenty four chapters eight are written by former students or colleagues with whom i have worked in the past and whom i still meet at conferences on geographical education it is with a certain pride and joy that i note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as chair of the commission on geographical education of the international geographical union cgeiug my successors joe stoltman hartwig haubrich rod gerber and now lea houtsonen have done much and are continuing to work hard to foster the development of geographical education this book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except antarctica it would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as fairgrieve 1926 would have put it and as rod gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

this teacher's guide is to enable the teacher to promote thinking through the use of geography the book lays out the rationale in learning theory for an issues based question driven inquiry method and proceeds through a simple model of progression from identifying key questions to developing generalizations students study issues of geographic significance by pursuing answers to geographic questions in the process developing meanings and understandings skills and personal perspectives values and attitudes there is a high value on active learning and higher level thinking in the materials each chapter contains several classroom activities for student decision making and analysis the chapters include the following 1 identifying key questions to plan learning activities 2 planning learning activities to reach generalizations and decisions 3 reaching generalizations and decisions through processing and interpreting data 4 interpreting and analyzing attitudes and values and 5 learning through geography extensive maps charts and figures accompany the text contains 75 references eh

this book provides a collection of critical pieces that support the idea that good teaching and learning of geography in fieldwork and using technology should consider the dimensions of curriculum design instructional design and resource provision as well as assessment for such learning activities further it clearly describes the thinking experiences and critical comments concerning two broad areas of learning outside the traditional classroom in the field and with technology

this resource book is intended to aid parents of children aged 2 to 5 years in teaching geography the book offers ideas about how to encourage and give direction to enable young children to develop the vocabulary awareness and curiosity necessary to lay the foundation for the study of geography suggested activities are included and are organized around five specific themes the themes are 1 where are things located 2 what characteristics make a place special 3 what are the relationships among people and places 4 what are the patterns of movement of people products and information and 5 how can the earth be divided into regions for study each chapter begins with background examples of questions geographers ask and explanations of the early developmental skills that are involved a 16 item reference list and glossary conclude the book along with maps a resource list with suggestions of where to get free maps and a list of easy reading or picture books related to geography lb

learning primary geography ideas and inspiration from classrooms celebrates children's learning in primary geography it is a book for all student and practising teachers who would like children to learn about their world in an enjoyable and stimulating way every page presents inspiring examples of children's learning and explains

how and why creative approaches such as enquiry learning learning outside the classroom and using imaginative resources work so well in primary geography using illustrated case studies from a range of schools and classrooms each chapter showcases the fantastic work all children can do in primary geography the book explores a wide variety of geographical learning with chapters focusing on key aspects of the subject including primary geography through the school grounds topical geography through issues and events learning about places in primary geography children s agency and action through primary geography throughout the chapters the role of primary geography in helping children develop all types of literacies including spatial critical and digital literacies is explored written by a highly experienced teacher and lecturer in education learning primary geography is underpinned and illustrated by examples from a wide range of primary classrooms it will be a source of support guidance and inspiration for all those teaching geography in the primary school

opportunities for developing innovative approaches in teaching and learning geography have been rapidly increasing in recent years this is in part because of the spread of new technologies that allow access to geographic information and geographic geo media resources these new tools offer broad access to information and open data sources they have revolutionised the way in which teachers of geography can work with pupils and students education for digital earth is now possible as such the exclusive use of traditional approaches to the teaching of geography is no longer reasonable today the european commission funded network initiative digital earth eu promotes innovation and best practices in the implementation of geo media as a digital learning environment for school learning and teaching this book supported by eurogeo analyses the main challenges facing geographical education curriculum methodology teacher education and training and geospatial technologies and illustrates different examples of the use of geoinformation in geographical education in several european countries

this book outlines how good teaching of primary geography can extend children s world awareness and help them make connections between their environmental and geographical experiences chapters offer guidance on important learning and teaching issues as well as the use and creation of resources from the school environment to the global context it covers all the key topics in primary geography including understanding places physical and human geography environmental sustainability learning outside the classroom global issues citizenship and social justice summaries classroom examples and practical and reflective tasks are included throughout to foster understanding and support the effective teaching of primary geography

this completely revised and updated new edition takes into account changes required by the national curriculum and by non statutory guidance for the early years as well as new literature and research related to early years geography teaching

this handbook is rich with practical advice on engaging and inspiring learners and teachers in geography lessons

includes the proceedings of the royal geographical society formerly pub separately

a companion to aspects of teaching secondary geography teaching geography in the secondary school a reader brings together a wide range of key writings that look at central issues debates and ideas surrounding geography education today it encourages students to reflect critically upon the issues in order to develop their understanding of these issues and to consider the implications for their classroom practice
